Result driven **SDET/QA Engineer** with **6+ years of experience** in building scalable **UI and API Automation Frameworks** for enterprise and product-based applications. Strong hands-on expertise in **Selenium,Java,TestNG,Rest Assured,CI/CD,and SQL** with proven success in reducing regression cycles and improving release quality in **Agile environments.**

EXPERIENCE

Quality Analyst |Servigistics R&D Team| PTC Inc **Jul'22 – Present**

PTC Inc. is a global software leader in PLM, CAD, IIoT , SLM, AR and ALM, used by over **35,000** businesses worldwide, including 95% of **Fortune 500** discrete manufacturers.

- Led automation initiatives reducing regression execution time by **30%.** Implement Page Object Model and data-driven testing,improving maintainability.
- Automate UI testing using **Selenium** with **TestNG** and execute **Sanity**, **Regression**, Functional, and Smoke tests and API Testing using Rest Assured and Postman.
- Enhanced data analysis, reporting, and decision-making processes using **Intellicus**.
- Managed **DevOps** tasks by provisioning instances with **Kubernetes** or deploying and configuring them with **SQL**, **Oracle**, or **Snowflake** on **Windows** or **Linux**.
- Reviewed and optimized **Automated Test** scripts to enhance reliability and coverage.
- Maintain a dashboard with instance details and developed an **auto-upgrade** job in **Automation** Tools & **Frameworks**.
- Exhibit expertise in the domains of test **estimation**, meticulous **planning**, and mentorship, coupled with the ability to adeptly facilitate and scrutinize **testcases.**
- Integrate automated test cases into the **CI/CD** pipeline using **Jenkins**.
- Contribute to **product discussions**, enhancing **performance** and **customer** experience.

Software QA Engineer | COFORGE **Jul'19 - Jul'22**

- Sound knowledge over **Zephyr**, **Postman** tool, Octopus, and **Bitbucket**.
- Used **Git** for version control, integrated **CI/CD pipelines** for faster testing.
- Having good hands-on SQL server databases and basic **ETL** concepts.
- Implemented **Page Object Model (POM**) for maintainable automation scripts and executed **data-driven** testing strategies, ensuring comprehensive test coverage.
- Ensured seamless integration of **100**+ new features into the website, focusing on • end-to-end testing and **API** functionality improving user satisfaction by **25**%.
- Knowledge to work in **defect management** process along with reporting and tracking tool **(JIRA)**
- Experienced in employing **Test Project Automation** testing tools to efficiently manage test cases, record results, and seamlessly integrate testing processes.
- Recognized for Agile collaboration, meeting deadlines with 5 cross-functional team.

PROJECTS UNDERTAKEN

Education

B. Tech | AKTU 2019
Percentage : 77%

Intermediate **2015**
Percentage: 72.3%

Tools & Technologies

Automation Tools
Selenium WebDriver, Java,TestNG,Postman Cucumber (BBD),Rest Assured.

Test Management Tools
JIRA,Zephyr,Swagger,Maven ,Intellicus

Database Tools
SQL,Oracle,Snowflake, DBeaver

Testing
UI Automation,API Testing,Regression,Smoke,Sanity,End-to-End Testing

API Documentation Tools
Swagger, Postman,

CI/CD & Devops
Jenkins, Kubernetes,

HYPERNOVA **Dec’19 - Jul’20**

- Understanding the requirement document and developing the test cases.
- Prepared Test Plans and scripts describing features and functions to be tested.
- Performed Regression testing, Bug fixing which were verified by QC/Jira Tool.

DAAS(DATA AS A SERVICE) **Aug’20 - Sep’21**

- Developing Web Automation Testcases for the identified Automation Scenarios.
- Prepared Test Plans and scripts describing the features and functions to be tested.
- Performed data analysis using SQL queries.

MUTUALFUNDDESK **Nov’21 - Mar’22**

- Participating in Scrum meetings and Retrospective meetings to analyse the Sprint Health.
- Giving Demo of the functionality to the Product owner before Sprint signoff.

SERVIGISTICS(SPM) **Jul’22 - Present**

- Participating in Forecasting Data to predict future demand based on past information.
- Calculate and verify the forecasted data using various mathematical methods such as average, weighted average.
- Extensively utilized SQL queries to predict future forecast values.
